## Birth / Post-delivery

Topol AG is a high-performance company that manufactures innovative sanitary and medical technology products of the highest quality, and distributes similar products as an exclusive partner.

- Birthing pools
- Birthing beds
- Delivery and examination chairs
- Obstetric aids
- Labour ward fittings
- Products for the maternity ward

# We'll be there with you on the journey of your life!

## Birth – Post-delivery – Wellbeing – Care

Topol AG specialises in manufacturing and trading in products for the hospital and domestic environment, particularly for births, post-delivery, bathing and showering, work surfaces and wellbeing systems specialized for the elderly.

# Models of birthing pools

The Topol birthing pool is both a working instrument and a philosophy. The perfect shape, the way each element is arranged and the matching accessories – all provide the expectant mother with the highest level of comfort, plenty of room to move and a feeling of security.

The latest discoveries regarding water births, our experience and our expertise were all used to good purpose in the development of Topol birthing pools. In our products we implement not only our own expertises and experiences, but also the latest discoveries in water birthing. The tub provides the mother-to-be with a sense of security, combined with plenty of space for her relaxation exercises. The slim, surrounding grip-edge rim and the handles give her security to hold on in all positions at all times.

A towel rail is used to support the mother when she stands up, while the steps and the handrail make it easier for her to get into the tub. The pool quickly through the beautiful bow-shaped water spout and the pleasantly warm material is easy to clean and is perfectly hygienic.

**There are practically no limits for your wishes due to design, colour and fittings.**

# Birthing and relaxation pool

## Generosa...

### “The proud and nobly-born”

- Ergonomically designed seat
- Large, round profiles to support the feet
- Easy-to-reach fittings
- Safe and easy to get in the pool
- High standards of hygiene
- Free choice of colour
- Broad range of options available (see table)

#### Technical details:

##### Dimensions

Length:	1720 mm
Width:	1165 mm
Height:	860 mm (water depth 500–550 mm)

Volume: 350–380 l

##### Weight

when empty: 95 kg

Filling time with DN19 thermo-mixer and curved water spout on edge of tub: approx. 14 minutes

Emptying time with Geberit 2" draining set: approx. 7 minutes

# Relaxation and birthing pool

## Technical details:

### Dimensions

Length: 1800 mm

Width: 1320 mm

Height: 890 mm

(water depth 610 mm)

Volumes: 450–500 l

### Weight

when empty: 105 kg

Filling time with DN19 thermo-mixer and curved water spout on edge of tub: approx. 20 minutes

Emptying time with Geberit 2" draining set: approx. 12 minutes

## Oceanis... “the large and calm”...

- Ergonomically designed seat
- Easy-to-reach fittings
- Safe and easy to get in the pool
- High standards of hygiene
- Free choice of colours
- Broad range of options available (see table)

# Options

Oceanis water spout

Grab handle

## Baths for babies and infants

### Material:

- Baby baths are made of fibreglass-reinforced plastic, double-walled and heat insulated
- Solid base is made of fibreglass-reinforced plastic, with 4 plastic double-castors with brakes, diameter 7 cm
- Height is fully adjustable from 85 to 115 cm using a gas pressure spring
- Fitted with a plug and a 40 cm hose for emptying into the WC or drain

### Options:

- Draining system including rocker valve with hose
- Draining system including rocker valve with hose and coupler for connection to a wall draining outlet

### Dimensions (internal, LxWxD):

Baby bath: 730x460x240 mm

Infant bath: 780x480x240 mm

Base: L 680 mm, W 470 mm

Colours: All RAL and NCS

## Work surfaces made of fibreglass-reinforced plastic

**We produce work surfaces, sinks, washing tables and individual combination units in accordance with your requirements.**

### All benefits at a glance

- Free choice of colour according to RAL and NCS
- Manufactured in one piece
- Long service life
- Easy to clean
- Non-porous, therefore ideal for perfect hygiene
- No surface discolouration
- Light, but highly stable
- Quick and easy to install
- High resistance to germicide disinfectance and force effects

## Combination units made of chrome plated steel for healthcare

# Heated cabinets

Available as built-in, table-mounted or mobile models

## Product features:

The To-WS heated cabinet is made entirely of stainless steel, completely sealed and uses an air circulation system. The hot air is distributed evenly inside the cabinet through air conducting foils. Temperature regulation is smooth and infinitely variable. Good insulation and economical use of electricity. Easy to operate.

## Implementation:

- Doors have a magnetic closure and are surrounded by rubber seals.
- Doors are hinged, with the hinge on left or right. The position of the hinge can be reversed without any difficulty.
- Door opens to 270°.
- Hot air is directed through slits in the back wall and the floor panel.
- Controllable inflow of air in the floor area.
- Slotted tray, adjustable in steps of 25 mm.
- Operating unit behind the installation compartment, with anti-fluff filter, fan and heating system.
- Installation compartment fitted at the top, but extensible, with a digital control system, main switch and safety feature.
- Universal controller with a digital temperature display.

The heated cabinets are used to keep items warm, like bedclothes, surgical dressings, wrapping cloths, bath towels, infusion solutions, hot water bottles, etc.

## Built-in model type To-WS

	Capacity	Height	Width	Depth
To-WS 400/460	30 litres	460	400	380
To-WS 400	65 litres	760	400	380
To-WS 545	120 litres	760	545	500
To-WS 550	150 litres	760	550	560
To-WS 1200	345 litres	760	1200	560

Built-in model

Table-mounted model with base

Mobile model

## Technical details

Material: X2CrNi 18-10  
 Option: Galvanised steel plate, 2K powder coated

## Operation

mode: Always on  
 Power supply: 230 V / 50 Hz  
 Output: 500 watt  
 Ambient temperature: Room temperature  
 Setting: At the works: 30°–55° C  
 Differential gap +/- 1° C.  
 Safety: Key-lock available

# Refrigerators for drugs and laboratories

Especially strict requirements are imposed upon cooling and refrigeration equipment in all professional areas of application. Every decision we make is focussed on our equipment's ability to be used long-term without any problems, whether in relation to cooling performance, specification of materials, design of refrigeration components or the development of design concepts.

## Refrigerators used to store drugs

Ventilated, with an insulated, self-closing solid or glass door. Optimal refrigeration performance is provided by dynamic, smoothly regulation of the temperature inside the cabinet. The equipment (with or without a freezer compartment) is designed in accordance with DIN 58345 and ÖNORM K 2040, and individual configurations can be provided. The appliance is free of CFC, PFC and HFC due to EU Directive No. 842/2006.

Built-in model

Freestanding

## Laboratory refrigerators

In the laboratory sector, extremely high standards are required in the areas of equipment reliability and safety. We offer appliances across a variety of temperature ranges in many areas of application.

# Handgrip systems

"Everybody has a right to live a life free of care". A day-to-day hygiene maintenance routine increases people's sense of well-being and promotes a good attitude to life. However, using the bath or shower can be difficult or even frightening for people who are older, sick or disabled, as they are unsure on their feet. We offer a variety of handgrips to ensure safe use at all times.

# Post-delivery

## Baby changing unit

- Well thought-through design with many practical functions
- Changing mat with removable cover
- Heat lamp with electronic safety control system
- Four smooth-running steerable castors with brakes operable on two of the four
- Drawer for baby scales
- Shallow drawer
- Deep drawer for nappies, etc.
- All the drawers pull out fully and have large handles
- Dimensions: 600 x 660 x 970 mm

Protection against rolling

### Heat radiator to maintain the body temperature of babies, infants and adults

Radiators are the ideal way to meet the everyday need for heat, from the point of view of optimal safety for patients and carers as well as ease of use. The high quality of manufacture guarantees long service life.

### Electronic baby scales with fine gradation, e.g. Seca 717

Maximum load: 15 kg

Gradation: 2 g < 6 kg > 5 g

Dimensions (WxHxD): 551 x 163 x 320 mm

Net weight: 6.5 kg

Power supply: Mains electricity calibration class (III)

High accuracy level provided by 2 g grad.

Option: Measur. bar, 640x120x277 mm

### Cosy Therm

Heat is produced by a uniform sheet of soft, conductive material that distributes heat evenly across the entire surface. The design allows the mattress to adapt to the shape of each individual patient. Therefore it offers the maximum contact area and high heat transfer characteristics.

### Lifetherm 2000 warming bed

This warming bed can be selected without a cover, with a closed cover or with a cover that can be folded open on both sides. The contact warming effect provided by the surface heating system develops this highly effective method of heat transfer even further. The soft gel mattress is pleasant for a baby, promoting thermal stability while avoiding pressure points. Contact temperature is displayed to an accuracy of  $\pm 0.1^{\circ}\text{C}$ .

A subtle warning tone sounds if the temperature deviates by more than  $1^{\circ}\text{C}$ .

# Baby cribs

## Leica model height-adjustable baby crib

- Baby crib made of transparent plastic with ventilation holes
- Can be adjusted in height on a chrome plated raising pillar, continuously adjustable in height from 870–1060 mm using a gas pressure spring
- Top and base sections adjustable through an angle of 12°
- Base section made of fibreglass-reinforced plastic and available in all RAL colours

Dimensions (LxW): 800x480 mm  
Internal height of crib shell 200 and 260 mm  
Base height from floor 125 mm  
Base 470 x 680 mm

The same material (fibreglass-reinforced polyester) is also useful for baby cribs as it withstands acids and alkalis. It is polished to a high gloss finish and is non-porous, which also makes it extremely hygienic. Available in all RAL colours.

## Lepori model mobile baby crib

- Frames are made of curved steel tubing with reinforcement in round steel
- All the steel parts are available with a powder coating in all RAL colours
- Crib shell and pushing handle are made of varnished beech wood, side walls made of plexiglas
- Integral tilted mattress position

Dimensions (LxWxH): Standard crib 770x450x1030 mm  
Twin crib 710x700x1030 mm

## Clivia model mobile baby crib

- Frame made of polished chromium-plated steel
- Crib shell made of fibreglass-reinforced polyester
- Adjustable side walls made of Plexiglas
- Polished stainless steel guide rails
- Inlay panel to tilt the mattress

Dimensions (LxWxH): 710x430x980 mm

## Nova – “The New”

### Mobile, height-adjustable baby crib, with direct attachment to the mother's hospital bed (optional)

- Developed in association with “Haute Ecole Arc Ingénierie Neuchâtel” university
- The mobile crib shell (optionally easy to fit or remove from the trolley frame) and base are made of fibreglass-reinforced plastic and are available in all RAL colours
- A special flange system can be used to attach the crib to the hospital bed
- The side panels are made of Plexiglas and can be lowerable or fixed according to requirements, with an optional flexible, transparent plastic mat
- Chrome plated raising pillar, continuously adjustable in height from 870–1060 mm using a gas pressure spring
- The wheels can be locked by hand on the side of the crib shell
- The angle of tilt can be adjustable, as an option

Dimensions (LxWxH): 710x430x281 mm

## For all models:

- 4 NW 70 steerable castors that can also be braked, electrically conducting, with wall bumper
- Mattress made of soft foam, PU-Safetex, rounded edges, moisture proof, wipeable, cover can be disinfected

### Options:

- Card holder, various designs
- Curtain rail
